

MK-Mark. More than just a door.

MK-Mark. More than just a door.

The MK-Mark is more than just a door

This door concept has many advantages:

- Wind resistance and watertightness up to 1200 Pascal
- 100% circular insulation by EverUse®, a unique material of Dutch origin
- Made of MDF Medite Tricoya®
- Noise reduction: 37 dB(A)
- Heat value: 0,6 U
- Standard fireproof
- Sustainability class 1
- Single seal; single rubber, easy to implement in an existing frame
- Patented technology
- Cradle-to-Cradle
- 25 year warranty

The new standard. Anything but standard.

The MK-Mark easily withstands every hurricane.

The standard for wind resistance and water-

tightness is 600 Pascal, but the Mark sets

a new standard with 1200 Pascal. The MK-Mark

is also unrivalled in terms of durability.

The patented door concept is made of certified

Cradle-to-Cradle products.

MDF Medite Tricoya®

The MK-Mark door is unique for several reasons.

It has a single seal so that existing frames don't

have to be adjusted. The exterior of the door is

made of MDF Medite Tricoya®. This is a sustain-

able type of wood with an exceptionally long

lifespan. That is why we give a 25 year warranty.

The inside of the MK-Mark is also unique,

thanks to the 100% circular EverUse® insulation

board. This firm, resilient cellulose board has

excellent thermal, acoustic and fireproof properties.

MK-Promax doorsill

The MK-Promax doorsill completes the

MK-Mark concept. The smart design of the

doorsill contributes to the unrivalled wind

resistance and watertightness of the door.

The doorsill is also patented.
